Skills

- **Development:** Dart/Flutter, ReactJS, RubyonRails, JavaScript, Git/GitHub, Agile Methodologies.
- **Data & Automation:** Python , SQL,

Analytical Computer Scientist **blending rigorous software engineering principles with advanced data science methodologies.** Proficient in Python, complex SQL, and statistical data modeling to architect robust data pipelines and intelligent automation workflows. Experienced in the fintech and B2B sectors, specializing in extracting actionable insights from large unstructured datasets, resolving backend data anomalies, and prototyping Agentic AI solutions. Eager to leverage my dual expertise in algorithmic system architecture and quantitative analytics to build scalable, data-informed technological solutions.

Experience

2026 - Current

Full Stack Developer

Kwara, Nairobi, Kenya
Architect and configure complex automated B2B workflows to eliminate manual operational bottlenecks for enterprise clients.

- **System Automation & Integration:** Architect and deploy automated workflows to streamline B2B operational processes for enterprise SACCO clients, ensuring high system availability.
- **Workflow Automation:** Architect and deploy automated workflows integrating complex B2B datasets, eliminating manual bottlenecks and ensuring high system availability for enterprise clients.
- **API Integration:** Configure secure API endpoints to facilitate seamless data transfer between disconnected systems.

2025-02 - 2025-03

Technical Support & Operations (Attachment)

Chumz by Moneto, Nairobi,Kenya

- **Real-Time Data & Analytics:** Engineered Python and SQL reporting pipelines to extract and aggregate complex transactional data, reducing reporting times by 30% and providing management with real-time operational insights.
- **Root Cause Analysis & DWH Support:** Investigated complex data mapping errors and silent data drifts, communicating findings clearly to senior operations staff and

Automated Reporting, LLM Data Extraction, n8n.

- **Platform Engineering:** RESTful APIs, JSON Payload Handling, Cloud Infrastructure (AWS concepts).
- **Methodology & DevOps:** Git Version Control, Agile Methodology, JIRA/Ticketing, Automated Testing, CI/CD concepts.
- **Enterprise Solutions:** Internal tool development, Workflow automation, Root-cause analysis.

Languages

English

Bilingual or Proficient (C2)

Swahili

Advanced (C1)

implementing preventative data validation rules.

- **Technical Support & Troubleshooting:** Provided dedicated IT and system support, executing routine maintenance and troubleshooting backend data flow issues to ensure seamless system operation.

2024-02 - 2024-03

Team Leader / Exchange Participant

AIESEC Egypt, Alexandria, Egypt

- **Global Collaboration:** Facilitated cross-border exchange programs, coordinating with international partners to ensure seamless logistical operations.
- **Connectivity:** Built strong relationships with global stakeholders, demonstrating the confidence to "Speak Up" and present ideas in a collaborative, fast-paced environment.
- **Confidentiality:** Handled sensitive member data and exchange participant information with total discretion and organizational integrity.

Education

2026

Informatics And Computer Science

Strathmore University - Nairobi

- Database Management Systems
- Machine Learning
- AI Automation
- Data Science & Analytics
- Software & Web Application Development
- Networks & Network Security
- Mobile App Development
- Server Administration

2024

Certification: Networking

Cisco Networking Academy

Cisco Certified Network Associate (CCNA) - Introduction to Networking

2022

Certification: Data Science

Strathmore University - Nairobi

- Data scraping & analytics using python.

- Data presentation using python.

High School

Light Academy - Nairobi

- Grade: B+

Projects

Agentic AI Workflow Engine (Capstone Project)

- **Agentic Development:** Architected a Python-based intelligent workflow engine utilizing Large Language Models (LLMs) to ingest unstructured data and format it into strictly validated JSON schemas.
- **System Integration:** Demonstrated advanced understanding of API integrations, automated data validation, and agentic problem-solving—skills.
- **Unstructured Data Processing:** Integrated multiple external data sources and LLMs into a unified, secure backend infrastructure, ensuring high-speed data parsing and reliable system uptime under complex user request loads.

Strathmover | Cross-Platform Mobile Application

- Architected a comprehensive, cross-platform logistics application utilizing microservices and secure RESTful APIs to manage real-time tracking, demonstrating a strong grasp of scalable network architecture.
- **OOP & Component Architecture:** Built a cross-platform application using Flutter/Dart, utilizing component-based UI architecture.
- **UI/UX:** Implemented a responsive, material design interface, focusing on intuitive navigation and smooth animations to enhance user engagement.
