Skills

- **Development**: Mobile Application Development, Web Application Development, and Front-End Development.
- **Data & AI**: Data Analytics, Data Scraping, Data Presentation using Python and Machine Learning.

I am a dedicated, forward-thinking Informatics and **Computer Science graduate** with a specialized background in Data Analytics and Presentation. I am a dynamic software developer with expertise in mobile and web application development. My academic background has equipped me with a strong foundation in algorithms, networking, server administration, and machine learning, thoroughly practiced through complex technical projects. I am well positioned to leverage these skills to make meaningful, data-driven contributions to the field.

Experience

2025-02 - 2025-03

Technical Support & Operations (Attachment)

Chumz by Moneto, Nairobi,Kenya

- **Root Cause Analysis & Data Quality:** Conducted routine audits of financial transaction logs, successfully identifying and remediating a "silent data drift" caused by a third-party API schema change, restoring 100% data accuracy.
- **Data Cleansing & Automation:** Investigated manual reporting inconsistencies and built automated SQL scripts to aggregate and clean transaction data, reducing reporting time by 30% and eliminating human error.
- **Documentation & Reporting:** Maintained strict documentation of data extraction processes and communicated findings to the operations team, ensuring alignment with internal compliance standards.

2024-02 - 2024-03

Team Leader / Exchange Participant

AIESEC Egypt, Alexandria, Egypt

- **Global Collaboration:** Facilitated cross-border exchange programs, coordinating with international partners to ensure seamless logistical operations.
- **Connectivity:** Built strong relationships with global stakeholders, demonstrating the confidence to "Speak Up" and present ideas in a collaborative, fast-paced environment.
- **Confidentiality:** Handled sensitive member data and exchange participant information with total discretion and organizational integrity.

- **AI Risk & Compliance:** Model Validation, Bias & Overfitting Mitigation, JSON Schema Validation, LLM Output Auditing.
- **Technical Skills:** SQL (Advanced Querying & Aggregation), Python (Pandas for Data Processing), Relational Databases.
- **Cloud Computing(Learning):** AWS Foundations (EC2, S3, RDS, VPC), Cloud Architecture, Deployment.

Languages

English

Upper intermediate (B2)

Education

Expected in 2026-08

Informatics And Computer Science

Strathmore University - Nairobi

- Database Management Systems
- Machine Learning
- AI Automation
- Data Science & Analytics
- Software & Web Application Development
- Networks & Network Security
- Mobile App Development
- Server Administration

2024-05

Certification: Networking

Cisco Networking Academy

Cisco Certified Network Associate (CCNA) - Introduction to Networking

2022-06

Certification: Data Science

Strathmore University - Nairobi

- Data scraping & analytics using python.
- Data presentation using python.

2022-04

High School

Light Academy - Nairobi

- Grade: B+

Projects

Strathmover | Cross-Platform Mobile Application

Developed a cross-platform bus seat booking mobile application using Flutter and Firebase, enabling users (e.g., students and staff) to register, log in, browse available trips, select seats, and manage trip history with real-time updates.

- **Tech Stack:** Utilized **Dart** for business logic and **Firebase** for real-time data storage and user authentication.
- **UI/UX:** Implemented a responsive, material design interface, focusing on intuitive navigation and smooth animations to enhance user engagement.

https://github.com/benweru/Strathmover

AI Workflow Engine (Capstone Project)

Developed a personalized travel itinerary generation system leveraging in-context learning and supervised fine-tuning of lightweight large language models.

- **Unstructured Data Processing:** Implemented dataset preprocessing pipelines, prompt–target pair construction, and quantitative evaluation using BLEU and ROUGE metrics.
- **AI Inference:** Deployed model inference on GPU infrastructure using RunPod and Google Colab, with a FastAPI backend and Next.js frontend.
